

QUALITY, INNOVATION, PERFECTION

OUR PROMISE

Professional painting systems
from HSM

NEVER CLEAN AGAIN.

The **ACE SPE-System** low-pressure paint spray gun with **interchangeable nozzle inserts**.

Discover the unique **ACE SPE-System** principle that allows you to **save time and cleaning agents** while significantly increasing your productivity sustainably.

The cleaning

Thanks to its advanced design, cleaning is quick and straightforward. It's sufficient to **clean only the color needle tip** without disassembling or soaking the paint spray gun completely. This way, you optimize your workflow and save valuable time.

High-quality air cap

Interchangeable nozzle insert

High-quality housing

Cleaning time

The quick cleaning not only increases the efficiency of your work but also makes it more sustainable.

Cleaning agent consumption

The reduced use of cleaning agents helps protect the environment and, at the same time, extends the lifespan of your premium paint spray gun.

*Note: Product depiction in black and white for illustration purposes; Original housing is anodized blue.

HSM

Interchangeable nozzle insert

Specially designed for professionals with high standards.

Our interchangeable nozzle inserts, available in sizes ranging from 1.2 mm to 2.5 mm, impress with precise and reproducible spraying performance.

The innovative exchange system saves you time and cleaning agents, as only the tip of the color needle needs to be cleaned. The reduction in cleaning agents is environmentally friendly and extends the life of your paint spray gun. Additionally, changing nozzle inserts prevents cross-contamination during color changes and clogging of the paint channel.

This exchange system allows for consistently excellent spraying performance, equivalent to a brand-new gun.

100

Quality

The ACE SPE-System nozzle insert revolutionizes the painting industry with uniform atomization and a consistent spray pattern for impressive results, performance, and reliability.

Protective cap

The precision component is sealed by a sturdy cap, protecting it from external influences during transportation. The cap is easily removed before use.

Serial number

Each component undergoes visual inspection and measurement. A serial number for traceability is laser-engraved onto the nozzle insert, and the data is archived for warranty claims.

EASY LINE

SPA-SYSTEM

With the Easy Line from the **SPA-System** series, handling and processing large quantities of **paints and lacquers** is even easier and more efficient.

Spray volume 500ml

Total volume 730 ml

1 Adapter - 2 Systems

Easy Line and Easy Line Mix

01

FlipFlop closure

The built-in FlipFlop closure in the cup lid allows for quick readiness.

02

Scaling

Our inner cup with integrated ml and oz scaling and a maximum fill line reliably prevents overfilling, ensuring a smooth workflow.

03

Quick opening

The Easy Line features two integrated cutouts in the cup that allow for effortless opening and enhanced user convenience.

04

Circumferential cup rim

Our Easy Line paint cup features a circumferential cup rim for enhanced stability and better handling. Trust in the proven quality that meets your requirements.

* The SPA-System Easy Line/ Easy Line Mix requires the use of an adapter between the paint container and the spray gun.

EASY LINE MIX

SPA-SYSTEM

With the Easy Line Mix from the **SPA-System** series, the handling and processing of **small quantities of paints and lacquers** become even easier and more efficient.

More details

01 DrehFix
Easy screwing and unscrewing of the lid without squeezing the cup.

02 Screen assembly
Quick assembly of the screen that can be directly inserted into the lid.

03 Raised inner rim
The raised inner rim in the lid prevents paint contamination in the thread and ensures a secure seal of the cup, contributing to a clean working environment.

04 Scaling
The easily readable scale from 1:1 to 10:1 and 20:1 allows for precise measurement of liquids for flawless painting results, thus avoiding costly mixing errors or rework.

05 FlipFlop closure
The firmly integrated FlipFlop closure in the cup bottom allows for quick readiness.

06 Circumferential cup rim
The circumferential cup rim with DrehFix allows for easy opening and closing without squeezing.

* The SPA-System Easy Line/ Easy Line Mix requires the use of an adapter between the paint container and the spray gun.

Dürr

EcoGun ACE

Together with our renowned partner Dürr, we have developed the EcoGun ACE, a groundbreaking innovation in the world of painting technology.

The groundbreaking ACE SPE-System features a low-pressure paint spray gun equipped with interchangeable nozzle inserts.

In this collaboration, our expertise and quality standards merge with Dürr's expertise to provide you with a product that sets new standards in the painting industry. This pioneering partnership allows us to offer you a final product for your painting work that combines the highest performance and exceptional precision. Trust in the EcoGun ACE to meet your painting requirements with a new level of efficiency.

01

Cup rim

The circumferential, enclosed rim of the cup prevents paint from entering the outer container and ensures a clean application.

02

Handle

The sturdy, ergonomic handle provides a secure grip for mixing and pouring, making work easy and comfortable.

03

Mixing cup insert

The transparent mixing cup insert with integrated ml and oz scaling allows for precise reading and measuring in the outer cup. It can be easily attached and replaced, eliminating the need for cleaning the outer cup.

04

Pouring spout

The pouring spout of the cup allows for easy, controlled pouring of paints and lacquers without spills, ensuring hassle-free handling and clean work surfaces.

05

Scaling

The precise scaling from 1:1 to 8:1, 10:1, 20:1, and 10:7 allows for accurate measurement for demanding painting tasks, preventing mixing errors and costly rework. The scaling film is scratch and cleaning agent-resistant thanks to modern In-Mould Labeling (IML).

06

Lid

The flat, tight-fitting lid allows the mixing cups to be stacked to save space, allowing for neat storage and efficient use of your storage space.

WHAT SETS US APART FROM OTHERS

We would like to introduce ourselves as an efficient partner who can offer optimal solutions for your tasks and requirements.

**Outstanding
Product Competence**

**Environmentally
Friendly Products**

**Good Value
for Money**

**User-Friendly
and Safe**

Our ACE SPE, Mixing Cup, and SPA-Systems were developed with these aspects in mind. This ensures that the requirements are implemented effectively and economically.

EXPERIENCE. **COMPETENCE.** TRUST.
