for professionals

CLEVER! THE MIXING CUP SYSTEM

9 BENEFITS YOU CAN'T DO WITHOUT

1. ... Overlapping rim around the edge of the inner cup stops paint or lacquer getting into the outer cup
2. ... Cup insert held securely in place by fixing points in the outer cup
3. ... Sturdy, ergonomic handle
4. ... Easy-to-read, non-scratch and solvent-resistant scales from 1:1 to 8:1, 10:1, 20:1 and 10:7
5. ... Optimised base shape for perfect mixing
6. ... Integral ml and oz scales on the inner cup
7. ... Spout to facilitate pouring
8. ... Transparent mixing cup insert is a perfect fit
9. ... Flat, tightly sealing lid enables mixing cups to be stacked to save space

PROVEN FUNCTIONALITY

Many renowned paint and lacquer manufacturers rely on HSM's top quality painting & lacquering systems. We are also proud of the positive user feedback we receive about the quality and functionality of our products.

➤ The well designed systems for professional mixing, pouring and storing paints and lacquer.

Easy and inexpensive mixing of paints and lacquers. The easy-to-read measurement scales [1: 1 to 8: 1, 10: 1, 20: 1 and 10: 7] on the outer container prevent expensive mixing errors. No need to clean mixing vessels thanks to the practical disposable cup inserts.

➤ Small

Mixed volumes	ml	500
Total volumes	ml	660

➤ Middle
