SPA SYSTEM EASY LINE MIX

THE ECONOMICAL, ECO-FRIENDLY DISPOSABLE CUP SYSTEM

- Direct mixing in the cup
- Paints and lacquers can be strained directly in the cup
- The proven flow cup principle ensures an excellent finish
- No need to clean the disposable cup: keeps costs down and is good for the environment
- Leftover paint or lacquer can be stored

SPA SYSTEM EASY LINE MIX PRECISION IN NEXT TO NO TIME

PROVEN FUNCTIONALITY

Many renowned paint and lacquer manufacturers rely on HSM's top quality painting & lacquering systems. We are also proud of the positive user feedback we receive about the quality and functionality of our products.

7 BENEFITS YOU CAN'T DO WITHOUT

- 1 ... The stable, ergonomically designed DrehFix ensures the lid can be opened and closed securely
- 2 ... Easy insertion of the required strainer (available in 105 µm, 125 µm and 195 µm)
- 3 ... Fast fitting of the cup to the adaptor connection
- 4 ... Elevated inner rim in the lid prevents mess
- 5 ... Integral flip-top connection in the base of the cup
- 6 ... Extra stability thanks to rim around the edge of the cup
- 7 ... Easy-to-read, non-scratch and solvent-resistant scales from 1:1 to 10:1 and 20:1

IMPORTANT TO KNOW

Our two systems, SPA easy line and SPA easy line mix, are perfect in combination with all paint and lacquer applications:

SPA easy line

Larger quantities of paint or lacquer can be replenished quickly and cleanly.

SPA easy line mix

Smaller quantities of paint or lacquer are mixed directly in the cup.

Adapter

Assures quick changeover between the two systems.
(Adapters are available for all the most common cup spray guns)

The SPA system easy line mix requires an adaptor between the cup and spray gun.
